- 3). Customized size, color, design and OEM,ODM logo all are available
- 4).Customized detail function and logo for inflatable arch are accepted
- 5). Payment Term: 50% deposit in advance and 50% balance payment against the production

The Inflatable Arch is an inflatable structure that is inflated by an external cold air inflation fan connected to the arch via a tube.Inflatable arch, when inflated and often used as entrances to events or as ad space and mile markers for races. Digital print log art and temporary banner areas.

Application: Schools, Kindergartens, Gardens, Residential districts, Playgrounds, Children's palace, Malls, Supermarkets, and other areas for advertising.

Setting up your arch

1. Take arch, stakes, rope, blower from the bag. Some blowers are internal and built into the arch itself. Instruction will note when there are difference in setup.
2. Unroll the arch. Layout the arch where you will be using it. Attach the blower to the arch inlet. Be sure the inlet is tied around the flange of the blower. (Skip this step if your arch has an internal blower). Tie the ropes to the tie-down points on the arch. There are 8 tie-down point. 4 in front and 4 in back. We only recommend using all 8 points if it will be very windy. Make sure all zippers on the bottom of the legs are zipped up and the velcro is secured. Plug the blower in. Turn the power button on (external blowers only). Arch will inflate in approx 30-120 seconds.
3. After the arch has fully inflated, stand the arch up(easiest with 2-3 people). Place the arch where you want it to be. Take

each tie-down rope and tie it to the stake (or your own weights). Pull each rope firmly so the arch is not leaning to either side. Place each stake at a reasonable distance so the arch is being both pulled down and out. This will keep the arch in place and help it from falling down.

Adjust as necessary. Sand bags or water jugs can be placed inside each leg for added stability.(access through zippers). Additional anchors can be attached to the anchor tabs on the bottom of each leg.

4. For longevity and ease of storage, when done, turn the blower off, remove the stakes/weights. Unzip the zippers so air can easily escape. Remove blower(external only). Once the arch is deflated, fold the arch in a symmetrical pattern to get it the most compact. Put all items back into carry bag. Be careful stakes will not puncture the arch fabric.

About Us:

Guangzhou King Inflatable Co.,Ltd have more than 5-year export experience in the field of advertising inflatables,including inflatable tents,inflatable water park,inflatable arches,inflatable sky dancers/ inflatable model,bouncy castle,etc King Inflatable is devoted to making high-quality products,providing competitive price,doing best service,modestly accepting each precious comments from our each client from all over the world.As it is,all of our inflatable products have been given consistent and valuable compliment by them.
