Packing	inflatable packed in PVC carrying bag, carton for blower
Logo	Can Be Print on the inflatable pool
OEM	acceptable

Advantages:

1. 100% manufacturer and factory direct sale.
2. Quality control:We use good quality thick PVC material for inside drawstrng which help form the inflatable shape. Thick PVC material will be more durable and can last for using time more long to manufacture all the welding inflatable pool.We match CE or UL air pump for the inflatable pool.the whole inflatable pool is made of 0.9 mm and 0.45mm PVC tarpaulin.
3. All of our workers have been worked in this field for 4-5 years at least.
4. We test the inflatable for three times to test if everything is OK before shipping.
5. For the anchor rings and handles on our products, we use the big high frequency welding machine to weld instead of glue on by hand.So the parts and the main body are fused together so the quality is very stable and will not peel off.
6. Stable Connection System. King Inflatable created original eyelet connection and anchor ring connection system which make the whole park very stable.

Maintenance and Storage:

- 1.Make the inflatable pool clean. Disinfect and clean it regularly
- 2.Must check all the inflatable pool before using .When finding the damage ,you must mend it in time.
- 3.When carrying the inflatable pool,you should avoid dragging and fraying it on concrete or other rough surface,which will result in leaking.
- 4.After use, please remove sundries outside and inside the pool. Make sure the pool is dry,especially on the valve.Then put it into cool and dry place.

FAQ:
