Advantage:

Material: Plato 0.4/0.55mm PVC tarpaulin

PVC Tarpaulin consists of 3 layers with a strong net inside , this kind of material is very strong and durable , it is very difficult for people to tear it off .Generally , for PVC Tarpaulin material , there are several regular thickness as follows : 0.4mm , 0.45mm , 0.55mm , 0.65mm and 0.9mm . 0.4-0.55mm in thickness will be used to produce blower stitching products ; 0.65mm and 0.9mm will be used to produce airtight welding products .

Accessories : it needs 3 blowers and 1 air pump to inflate , blowers would be used to inflate the water slides , air pumps would be used to inflate the pool . They need to connect the electricity power to start the inflation .

Blowers : Volt - 220-240V(CE) 110-115V(UL) Power - 330w , 450w , 680w ,750w , 1100w and 1500w .

For 3 water slides , we will send you 1 sets 680w blowers

Payment terms: 50% deposits to let the order started and 50% balance when the products are finished You can make the payment by TT , alibaba , western union , moneygram or Paypal .

Warranty : 1 years . Within warranty period , if there are any quality problem , our company will try our best to get it re-worked ; if failed , we promise to make a new one for you .

Test : after your products are finished , if you can't come to test the quality yourself , we will take some high resolution pictures for your confirmation , if ok , then you can pay the balance .

Shipment : There are generally 3 kinds of shipping way , by express , by plane and by sea . This set of water park is very heavy ,shipping by sea is the best choice .

OEM & ODM can be accepted , pls let us know your specific requirements .

Installation of Inflatable Product

1. Place the equipment on a flat surface, preferably under a piece of equipment (such as carpet, plastic color of the cloth), and then expand it.
2. Find the air inlet of the equipment, connect with the air outlet of the blower or air pump, and fasten it, then tighten the air inlet with a rope.
3. Turn on the blower and the item will blow up in 5-10 minutes.

Maintenance of Equipment

1. Cut off the power, open the interface and exhaust, exhausting in generally 10-25 minutes, the remaining gas to squeeze. If

the equipment was wet by rain water, please be sure to drain water out and dry.

2. Do some cleaning. You can use the detergent to wash it, and wipe with water, and then dry in the sun.

3. Fold the device, and cover it with a tarp.

4. If long time no use it, you should keep it clean and packaged. Storage temperature is generally -50 ~ +40 degrees Celsius is appropriate.

5 Blower or air pump should prevent from moisture and corrosion. Inflatable items should keep away from insect.
